Le "Querce di Assisi" is the ideal place where to regenerate from daily stress and experience nature and culture in a 30 hectares fenced wood.

The village was built around an old XIII century "francescano" mill, surrounded by the woods of Assisi in the Tescio valley within the Subasio resort. Special places where life runs in a different atmosphere, mystic places in touch with the uncontaminated nature of Umbria with several wild animal species, where one can contemplate the transcendence in such a holy site and regain faith.
